

Orthopedic Casting Splint

Breathable

Breathable Design
Fast Set-Up

Features

- Strong and durable, better conformability
- Breathable, increase patient comfort
- Reduces the risk of skin irritation and itching caused by traditional plaster fixation
- Fast set-up, no plaster clean-up, no gloves and easy removal
- Easy to cut and soft liner stretches easily to cover splint edges
- X-ray Translucent

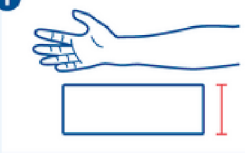

U-Kast® casting splint is made of synthetic polymer covered with soft padding on both sides. Splint provides stabilization in 2-3 minutes and enables weight bearing in just 20 minutes. Breathable design which increases air circulation, reduce risks of dermatitis, itching and other symptoms. Dry skin contact surface, safe and comfort.

Pre-cut lengths

Available in various widths and lengths
